Section I Basic fundamentals, synthesis and characterization

1. Introduction to nano materials	3
<i>N. Thejo Kalyani and Sanjay J. Dhoble</i>	
1.1 Introduction	3
1.1.1 Nano technology	4
1.1.2 Nano science	4
1.1.3 Nanomaterials	5
1.2 Classification of nano materials	5
1.2.1 Zero-dimensional (0D) nanomaterials	6
1.2.2 One-dimensional (1D) nanomaterials	6
1.2.3 Two-dimensional (2D) nanomaterials	6
1.2.4 Three-dimensional (3D) nanomaterials	6
1.3 What is so big on these small things?	7
1.3.1 Surface area	7
1.3.2 Quantum confinement effect	8
1.4 Materials for the synthesis of nano materials	9
1.4.1 Carbon-based materials	10
1.4.2 Metal-based materials	10
1.4.3 Dendrimers	10
1.4.4 Composites	10
1.5 Properties of nanomaterials vs bulk materials	11
1.5.1 Physical properties	11
1.5.2 Chemical properties	11
1.5.3 Optical properties	11
1.5.4 Electrical properties	12
1.5.5 Mechanical properties	12
1.5.6 Magnetic properties	12
1.6 Synthesis of nanomaterials	13
1.6.1 Top-down approach	13
1.6.2 Bottom-up approach	14
1.7 Deposition techniques of nano materials on to substrate	19
1.7.1 Chemical vapor deposition method	19

1.7.2	Physical vapor deposition	20
1.8	Characterization techniques	21
1.8.1	Scanning electron microscope	22
1.8.2	Transmission electron microscope	24
1.8.3	Scanning tunneling microscopy	25
1.8.4	Atomic force microscopy	27
1.8.5	Energy dispersive X-ray spectroscopy	28
1.9	Some special nano materials	29
1.9.1	Zeolites	29
1.9.2	Graphene	31
1.9.3	Fullerene or bucky balls	31
1.9.4	Carbon nanotubes	33
1.9.5	Quantum dots	34
1.10	Applications of nano materials	35
1.11	Impact of nanoscience and nanotechnology	36
1.12	Conclusions	38
	References	38
2.	Quantum dots: a brief review	41
	<i>Amol Deshmukh, Jitendra Bhaiswar, Vinod Kapse and Dhiraj Meghe</i>	
2.1	Background and introduction	41
2.2	Structure of quantum dots	42
2.3	Classification of quantum dots	42
2.3.1	Inorganic QDs	42
2.3.2	Organic QDs	44
2.3.3	Hybrid QDs	44
2.3.4	Colloidal QDs	44
2.3.5	Water-soluble QDs	45
2.3.6	Epitaxial QDs	45
2.3.7	Graphene QDs	45
2.3.8	Perovskite QDs	45
2.3.9	Carbon nanodots	46
2.4	Properties	46
2.4.1	Quantum confinement effects and band gap	48
2.4.2	Successful mass approximation model	49
2.4.3	Straight combination of atomic orbital theory—molecular orbital theory	49
2.4.4	Luminescence properties	50
2.5	Synthesis processes	50
2.5.1	Combination processes	50
2.5.2	Hierarchical synthesis processes	50
2.5.3	Granular perspective	51
2.5.4	Wet-chemical methods	51
2.5.5	Sol—gel process	52
2.5.6	Colloidal synthesis	52

2.5.7	Plasma combination	53
2.5.8	Manufacture	53
2.5.9	Viral gathering	54
2.6	Prior state of the art	54
2.7	Practical concerns	55
2.7.1	Stability	55
2.7.2	Disposal	55
2.7.3	Toxicity	56
2.8	Applications of quantum dots	57
2.8.1	Subcutaneous record keeping	57
2.8.2	Quantum speck tests display in vivo poisonousness	59
2.8.3	Photovoltaic gadgets	59
2.8.4	Quantum spot just sun-oriented cells	60
2.8.5	Quantum spot in crossover sun-powered cells	60
2.9	Future perspective	60
2.10	Conclusions and future scope	61
	References	61
	Further reading	66
3.	Quantum dots synthesis for photovoltaic cells	67
	<i>Y.C. Lee, M.H. Buraidah and L.P. Teo</i>	
3.1	Introduction	67
3.2	Basic understanding of quantum dot	69
3.3	Quantum dot solar cells	72
3.3.1	Schottky quantum dots solar cells	73
3.3.2	Heterojunction quantum dot solar cells	75
3.3.3	Photoelectrochemical quantum dot solar cells	75
3.4	Quantum dot synthesis	78
3.4.1	Successive ionic layer adsorption and reaction method	79
3.4.2	Chemical bath deposition technique	83
3.4.3	Colloidal synthesis	85
3.4.4	Electrodeposition technique	88
3.4.5	Ion beam sputtering deposition	90
3.5	Summary	91
	Acknowledgments	91
	References	91
4.	Quantum confinement effects and feasible mechanisms of multicolor emitting afterglow nanophosphors	99
	<i>Vishnu V. Jaiswal and D. Haranath</i>	
4.1	Introduction	99
4.1.1	History of afterglow phosphor	99
4.1.2	Photometry of colorimetry of afterglow phosphors	100
4.1.3	Quantum confinement effects in 0D, 1D, 2D, and 3D nanophosphors	102
4.1.4	Applications of quantum confined nanophosphors	107

4.2	Eu ²⁺ activated host lattices and their optical properties	108
4.2.1	Aluminates	108
4.2.2	Borates	108
4.2.3	Halides	111
4.2.4	Nitrides	111
4.2.5	Oxides	111
4.2.6	Phosphates	112
4.2.7	Silicates	112
4.2.8	Sulfides and sulfates	112
4.2.9	Stannates	113
4.2.10	Titanates	113
4.3	Synthesis methods for Eu ²⁺ phosphors	113
4.3.1	Solid-state reaction method	114
4.3.2	Sol–gel method	114
4.3.3	Combustion method	114
4.3.4	Coprecipitation method	114
4.3.5	Microemulsion-assisted method	115
4.3.6	Laser ablation method	115
4.3.7	Microwave-assisted method	115
4.3.8	Ultrasonic spray pyrolysis method	116
4.3.9	Template-assisted method	116
4.3.10	Hydro/solvo thermal method	116
4.4	Morphologies of Eu ²⁺ doped phosphors	117
4.4.1	Quantum dots	117
4.4.2	Nanowires, tubes, belts and -fibers	118
4.4.3	Nanorods	118
4.4.4	Nanosheets and thin films	119
4.4.5	Other morphologies	120
4.5	Mechanisms of Eu ²⁺ doped afterglow phosphors	121
4.5.1	Conduction-valence band model	121
4.5.2	The Matsuzawa model	122
4.5.3	The Aitasalo model	122
4.5.4	The Dorenbos model	123
4.5.5	The Clabau model	124
4.5.6	Quantum tunneling model	125
4.5.7	Oxygen vacancy model	125
4.6	Conclusions	126
	Acknowledgment	127
	References	128
5.	Quantum dot displays: group II–VI compound materials and technology	139
	<i>Sonal Sahai and D. Haranath</i>	
5.1	Introduction: why quantum dots?	139

5.2	Group II–VI compound quantum dots: boon to innovation	139
5.2.1	Electronic and optical properties of group II–VI quantum dots	140
5.2.2	Synthesis of group II–VI quantum dots	144
5.2.3	Core-shell structured group II–VI quantum dots	145
5.2.4	Cd-free group II–VI quantum dots	146
5.3	Principles and mechanism of quantum dots based displays	146
5.3.1	Working principle of quantum dot displays	147
5.3.2	Device structure	148
5.3.3	Printing process	149
5.4	Group II–VI quantum dots display devices: materials design	149
5.5	Progressive strategies employed for modern group II–VI quantum dots display devices	150
5.5.1	Flexible display device	150
5.5.2	Flexible transparent device	150
5.6	Current available technologies in the market	150
5.7	Future demands and scope	151
5.8	Conclusions	151

Section II Quantum dots: Applications and prospectives

6.	Quantum dots-based solar cells: Futuristic green technology to accomplish the energy crisis	157
	<i>G.P. Darshan, D.R. Lavanya, B. Daruka Prasad, S.C. Sharma and H. Nagabhushana</i>	
6.1	Introduction	157
6.2	Various generations of SCs	160
6.2.1	First-generation SCs	160
6.2.2	Second-generation SCs	163
6.2.3	Third-generation SCs	164
6.2.4	Fourth-generation SCs	166
6.3	Architectural design of QDS SCs	167
6.3.1	Excitonic absorber	168
6.3.2	Electron transport material	169
6.3.3	Hole transport material	173
6.3.4	Counter electrode	176
6.4	Experimental background in quantum dot SCs	176
6.4.1	Current-voltage characteristics	176
6.4.2	Electrochemical impedance spectroscopy	177
6.5	Summary and future prospects	179
	References	180

7. Perovskite quantum dots	189
<i>Amol Nande, Swati Raut, R.G. Tanguturi and Sanjay J. Dhoble</i>	
7.1 Introduction	189
7.2 Perovskite materials	189
7.2.1 History and development of perovskite	189
7.2.2 Crystal structure	190
7.3 Perovskite nanostructure	192
7.3.1 Perovskite quantum well	194
7.3.2 Perovskite quantum dot	194
7.4 Electrical and magnetic properties of perovskite quantum dots: a brief review	196
7.5 Optical properties of perovskite quantum dots	199
7.5.1 Photovoltaic properties and solar cell applications	199
7.5.2 Luminescence properties and LEDs' applications	201
7.5.3 Photocatalysis properties	204
7.6 Concluding remarks	206
References	206
8. Quantum dots made with using of anodic aluminum oxide template: fabrication and application	215
<i>Marta Michalska-Domańska and Sanjay J. Dhoble</i>	
8.1 Introduction	215
8.2 Characterization of anodic aluminum oxide	216
8.2.1 Fabrication method vs morphology of anodic aluminum oxide	217
8.2.2 Main physicochemical and material properties of anodic aluminum oxide	222
8.3 Application of anodic aluminum oxide in fabrication of quantum dots	222
8.3.1 Anodic aluminum oxide template-assisted method	224
8.3.2 Fabrication methods of quantum dots with using of anodic aluminum oxide	226
8.4 Perspectives of anodic aluminum oxide in quantum dots fabrication	228
Acknowledgments	228
References	228
9. Synthesis, structural properties, and applications of cadmium sulfide quantum dots	235
<i>Vikas Lahariya, Marta Michalska-Domańska and Sanjay J. Dhoble</i>	
9.1 Introduction	235
9.1.1 Historical background	236
9.1.2 Quantum dots	236
9.2 Cadmium sulfide quantum dots	237
9.2.1 Cadmium sulfide core/shell quantum dots	239

9.3	Synthesis of cadmium sulfide quantum dots	241
9.4	Structural studies of cadmium sulfide quantum dots	243
9.5	Optical studies of cadmium sulfide quantum dots	244
9.6	Applications of cadmium sulfide quantum dots	248
9.6.1	Phosphor applications of cadmium sulfide quantum dots	248
9.6.2	Photocatalytic applications of cadmium sulfide quantum dots	252
9.6.3	Photovoltaic applications of cadmium sulfide quantum dots	254
9.6.4	Sensor applications of cadmium sulfide quantum dots	259
9.7	Possible challenges and future scope	260
9.8	Conclusions	261
	References	261
10.	CdSe and Ag₂S quantum dots: synthesis, effects of doping, and applications	267

Divya P. Barai Department of Chemical Engineering, Laxminarayan Institute of Technology, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra, India

Jitendra Bhaiswar Department of Electronics Engineering, Nagpur Institute of Technology, Nagpur, Maharashtra, India

Bharat A. Bhanvase Department of Chemical Engineering, Laxminarayan Institute of Technology, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra, India

M.H. Buraidah Centre for Ionics University of Malaya, Physics Department, Faculty of Science, Universiti Malaya, Kuala Lumpur, Malaysia

G.P. Darshan Department of Physics, Faculty of Mathematical and Physical Sciences, M.S. Ramaiah University of Applied Sciences, Bengaluru, Karnataka, India

Amol Deshmukh Department of Electronics Engineering, Nagpur Institute of Technology, Nagpur, Maharashtra, India

Sanjay J. Dhoble Department of Physics, R.T.M. Nagpur University, Nagpur, Maharashtra, India

Neha Dubey Department of Physics, Govt. V.Y.T. PG Autonomous College, Durg, Chhattisgarh, India

Vikas Dubey Department of Physics, Bhilai Institute of Technology Raipur, Raipur, Chhattisgarh, India

L.B.E. Gunasekara Faculty of Science, Department of Physics and Post Graduate Institute of Science, University of Peradeniya, Peradeniya, Sri Lanka

D. Haranath Luminescent Materials and Devices Group, Department of Physics, National Institute of Technology, Warangal, Telangana, India

Vishnu V. Jaiswal Luminescent Materials and Devices Group, Department of Physics, National Institute of Technology, Warangal, Telangana, India

N. Thejo Kalyani Laxminarayan Institute of Technology, Nagpur, Maharashtra, India; Department of Applied Physics, Laxminarayan Institute of Technology, Nagpur, Maharashtra, India

Yogendra D. Kanna Department of Chemical Engineering, Laxminarayan Institute of Technology, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra, India

Vinod Kapse Department of Electronics Engineering, Noida Institute of Engineering & Technology, Greater Noida, Uttar Pradesh, India

Jagjeet Kaur Department of Physics, Govt. V.Y.T. PG Autonomous College, Durg, Chhattisgarh, India

K.S. Kiran Department of Physics, Faculty of Engineering and Technology, Jain Global Campus, Bengaluru, Karnataka, India

Pragati Kumar Nano-Materials and Device Lab, Department of Nanoscience and Materials, Central University of Jammu, Jammu, Jammu and Kashmir, India

Vikas Lahariya Amity School of Applied Sciences, Amity University Gurugram, Gurugram, Haryana, India

D.R. Lavanya Prof. C.N.R. Rao Centre for Advanced Materials, Tumkur University, Tumkur, Karnataka, India

Y.C. Lee Centre for Ionics University of Malaya, Physics Department, Faculty of Science, Universiti Malaya, Kuala Lumpur, Malaysia

N.A. Masmali Centre for Ionics University Malaya, Department of Physics, University of Malaya, Kuala Lumpur, Malaysia; Faculty of Science, Department of Physics, Jazan University, Jazan, Saudi Arabia

Dhiraj Meghe Department of Electronics Engineering, Nagpur Institute of Technology, Nagpur, Maharashtra, India

Marta Michalska-Domańska Institute of Optoelectronics, Military University of Technology, Warsaw, Poland

S.K. Muzakir Ionic Materials Team, Faculty of Industrial Sciences and Technology, Universiti Malaysia Pahang, Kuantan, Pahang, Malaysia

H. Nagabhushana Department of Studies and Research in Physics, Tumkur University, Tumkur, Karnataka, India; Prof. C.N.R. Rao Centre for Advanced Materials, Tumkur University, Tumkur, Karnataka, India

Amol Nande Guru Nanak College of Science, Chandrapur, Maharashtra, India

Z. Osman Centre for Ionics University Malaya, Department of Physics, University of Malaya, Kuala Lumpur, Malaysia

B. Daruka Prasad Department of Physics, BMS Institute of Technology and Management, Bengaluru, Karnataka, India

H.B. Premkumar Department of Physics, Faculty of Mathematical and Physical Sciences, M.S. Ramaiah University of Applied Sciences, Bengaluru, Karnataka, India

Neha S. Raut Department of Pharmaceutical Chemistry, Smt. Kishoritai Bhoyar College of Pharmacy, Kamptee, Maharashtra, India

Swati Raut Department of Physics, R.T.M. Nagpur University, Nagpur, Maharashtra, India

M.A. Saadiah Department of Chemistry, Centre for Foundation Studies, International Islamic University Malaysia, Gambang, Pahang, Malaysia; Ionic Materials Team, Faculty of Industrial Sciences and Technology, Universiti Malaysia Pahang, Kuantan, Pahang, Malaysia

Sonal Sahai Department of Physics, St. John's College, Agra, Uttar Pradesh, India

A.S. Samsudin Ionic Materials Team, Faculty of Industrial Sciences and Technology, Universiti Malaysia Pahang, Kuantan, Pahang, Malaysia

N.F. Shaafi Ionic Materials Team, Faculty of Industrial Sciences and Technology, Universiti Malaysia Pahang, Kuantan, Pahang, Malaysia

S.C. Sharma National Assessment and Accreditation Council, Bengaluru, Karnataka, India; Jain University, Bengaluru, Karnataka, India; Centre for Energy, Indian Institute of Technology, Guwahati, Assam, India

Sanjay P. Shirsat Department of Chemical Engineering, Laxminarayan Institute of Technology, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra, India

G.R. Suman Department of Physics, School of Applied Sciences, Reva University, Bengaluru, Karnataka, India

Mayuri Tambe Department of Chemical Engineering, Laxminarayan Institute of Technology, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra, India

R.G. Tanguturi Department of Materials Science and Engineering, Hubei University, Wuhan, P.R. China

L.P. Teo Department of Physical Science, Faculty of Applied Sciences, Tunku Abdul Rahman University College, Setapak, Kuala Lumpur, Malaysia

Rajendra P. Ugwekar Department of Chemical Engineering, Laxminarayan Institute of Technology, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur, Maharashtra, India

Milind J. Umekar Department of Pharmaceutics, Smt. Kishoritai Bhoyar College of Pharmacy, Kamptee, Maharashtra, India

B. Vengadaesvaran Higher Institution Centre of Excellence (HICoE), UM Power Energy Dedicated Advanced Centre (UMPEDAC), Level 4, Wisma R&D University of Malaya, Kuala Lumpur, Malaysia

W.M.C.Y. Wijesundara Faculty of Science, Department of Physics and Post Graduate Institute of Science, University of Peradeniya, Peradeniya, Sri Lanka
